Product Warranty

If, during normal use, this Xtreme Garage™ product breaks or fails due to a defect in materials or workmanship, simply return it to a Menards® retail store for a free replacement of the same or a similar Xtreme Garage™ product or part. This warranty excludes expendable parts, and normal wear and tear on finishes. This Warranty is void if used in Commercial and/or rental purposes. And does not cover any loss to property or injuries to persons or property or related costs. This Warranty does give you specific legal rights, and you may have other rights which vary from State to State.

Adjustable Work Bench

<p>A Left Upright</p>	<p>C Cross Beam</p>	<p>I Cross Beam Bracket QTY: 2</p>
	<p>D Cross Beam</p>	<p>J Cross Beam Bracket QTY: 2</p>
	<p>E Cross Beam</p>	<p>K Bolt QTY: 29</p>
	<p>F Cross Beam</p>	<p>L Nut QTY: 29</p>
<p>B Right Upright</p>	<p>G Cross Beam</p>	<p>M Leveling Feet QTY: 4</p>
	<p>H Cross Beam</p>	

Step 1 Assembly

Attach the four leveling feet (M) to the bottom of left upright (A) and right upright (B).

Step 2 Assembly

1. To set desired work bench width, slide the cross beam (D) into the cross beam (C). Line up the three holes on cross beam (C) with three holes cross beam (D). Use the picture below as reference for proper bolt placement.

2. Secure the cross beam (C) to cross beam (D) using three bolts (K) and 3 nuts (L). Only finger tighten at this time.

Step 3 Assembly

Attach cross beam (C-D) to the left and right uprights (A)(B) using six bolts (K), six nuts (L), one cross beam bracket (I) and one cross beam bracket (J). Only finger tighten the hardware at this time.

Step 4 Assembly

1. Assemble cross beams (E & F) using the same measurement from step two. Slide the cross beam (F) into the cross beam (E). Line up the three holes on cross beam (E) with three holes cross beam (F). Use the picture below as reference for proper bolt placement.

2. Secure cross beam (E) to cross beam (F) using three bolts (K) and 3 nuts (L). Only finger tighten at this time.

Step 5 Assembly

Attach cross beam (E-F) to the left and right uprights (A)(B) using six bolts (K), six nuts (L), one cross beam bracket (I), and one cross beam bracket (J). Only finger tighten hardware at this time.

Step 6 Assembly

1. Assemble cross beams (G & H) using the same measurement from step two and step four. Slide the cross beam (H) into the cross beam (G). Line up the three holes on cross beam (G) with three holes cross beam (H). Use the picture below as reference for proper bolt placement.

2. Secure cross beam (E) to cross beam (F) using three bolts (K) and 3 nuts (L). Only finger tighten at this time.

Step 7 Assembly

Attach cross beam (G-H) to the left and right uprights (A)(B) using two bolts (K) and two nuts (L). Only finger tighten hardware at this time.
